# Gaming With Ubuntu

In this session you will...

- Learn to run windows games and applications more successfully under Ubuntu.

- Hear about some great free games that love Ubuntu just as much as you do.

- Find out how you can become part of the Linux/Ubuntu gaming community and help make Gaming with Ubuntu even better =).
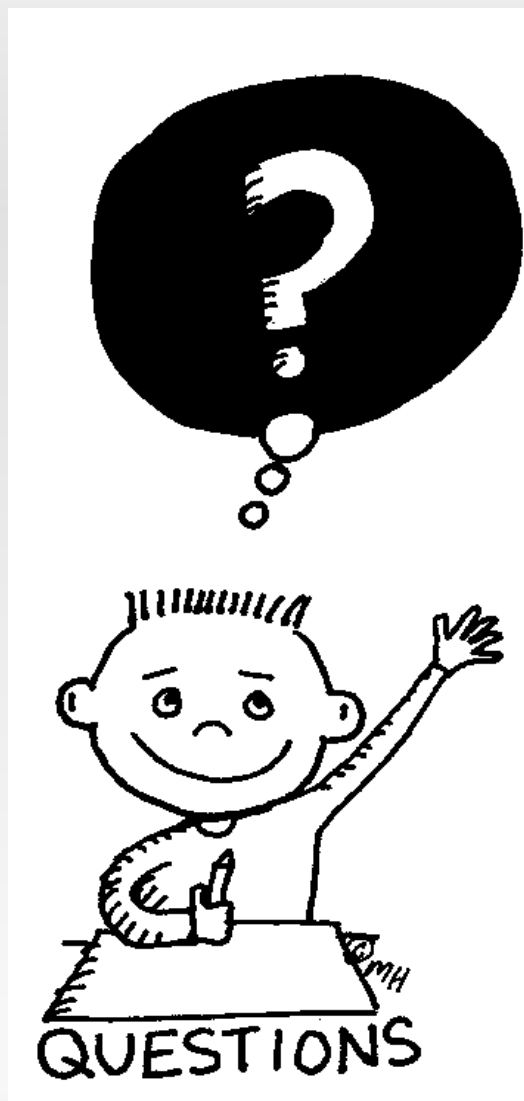

Ben Crisford

ubuntu

Section 1 - Emulation

- Windows emulation software allows you to run windows games (and other applications) under other operating systems.

- Wine is probably the most popular emulator for Ubuntu (Scott Richie ran a session on this on Tuesday – see the session log for more information).

- PlayOnLinux is a graphical front-end for Wine which makes using Wine more quick and easy.

Section 1 - Q+A
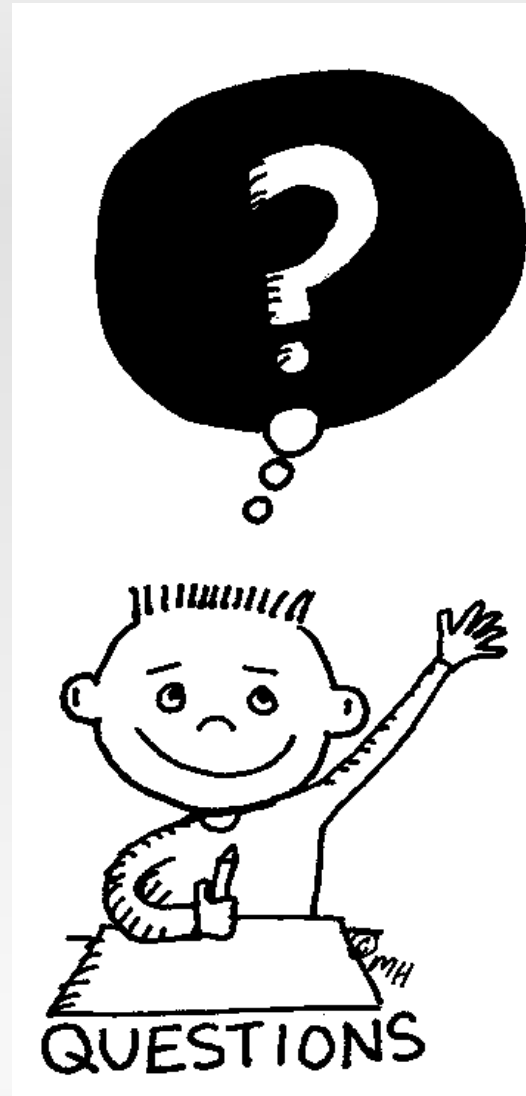

Section 2 – FOSS Games

- FOSS Stands for "Free and Open Source Software", which means that said software (and its source code) are free to download and modify.

- The games that ship with Ubuntu (chess, tetris etc) are "free and open source" games.

- There are many FOSS games available in the "Ubuntu Software Centre" and online.

- "Yo Frankie!" is a free game available in the software centre in Lucid (10.04).
