

## Complaints of Safety Problems at U.S. Nuclear Power Plants from On-Site Employees & Contractors\*

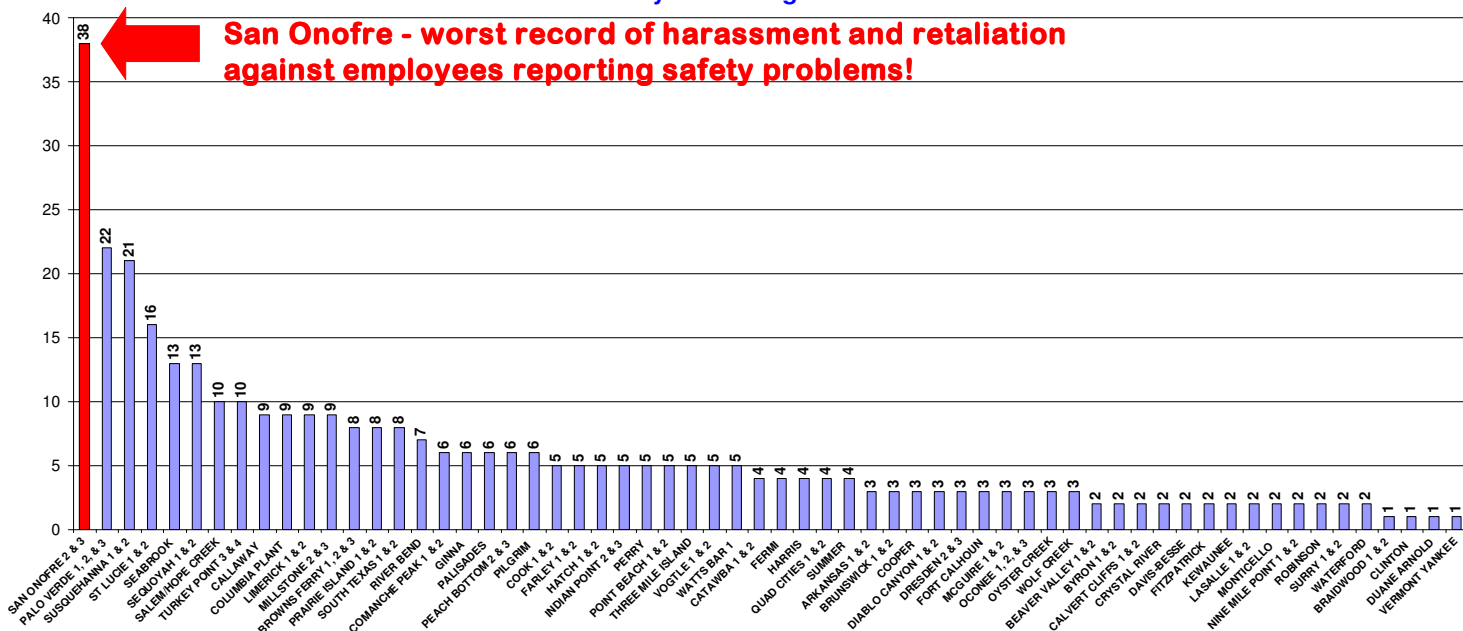

January 2007 to August 2011

\*The Nuclear Regulatory Commission (NRC) refers to these complaints as "Allegations from On-Site Sources" (current/former power plant employees/contractors and anonymous allegers). These are reports of impropriety or inadequacy of NRC-related safety or regulatory concerns. (Note: A concern about a safety-conscious work environment (SCWE) problem at a facility is an important allegation. However, a Notice of Violation cannot be issued, because there is no applicable NRC regulation.) There are 64 U.S. nuclear power plants; Most have more than one reactor, as noted after their name.

## Complaints of Employee Harassment and Retaliation at U.S. Nuclear Power Plants\*

January 2007 - August 2011

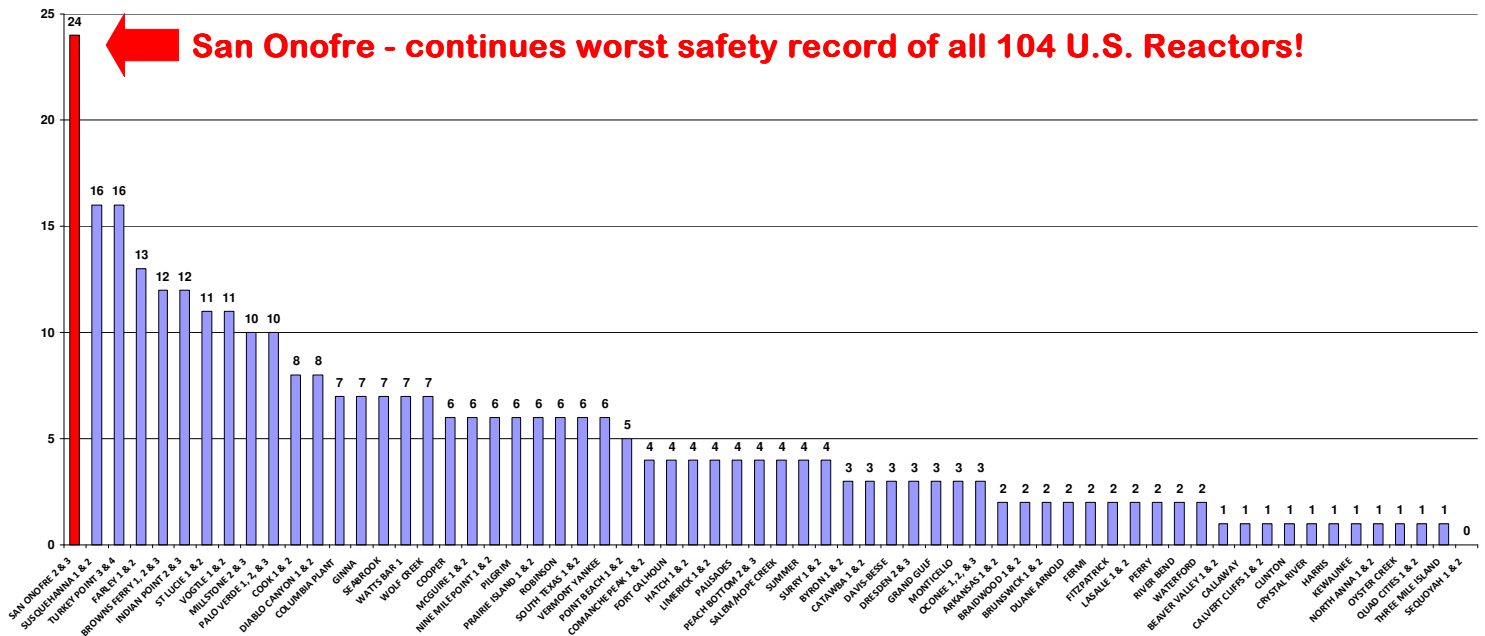

\*The Nuclear Regulatory Commission (NRC) refers to these reports as "Discrimination Allegations" from employees, contractors, or subcontractors of harassment, intimidation, or discrimination for raising NRC-related safety or regulatory concerns. "Discrimination Allegations Received" is a subset of all "Allegations Received." Note: There are 64 nuclear power plants; the majority have more than one reactor for a total of 104 reactors in the U.S.

## Complaints of Safety Problems at U.S. Nuclear Power Plants

from All Sources External to the NRC\*

January 2011 - October 2011

## SAN ONOFRE Nuclear Power Plant vs.

## All Other U.S. Nuclear Power Plants

Complaints of Safety Problems from On-Site Employees & Contractors\*

January 2007 - December 2010

\*The Nuclear Regulatory Commission (NRC) refers to these complaints as "Allegations from On-Site Sources" (current/former power plant employees/contractors and anonymous allegers). These are reports of impropriety or inadequacy of NRC-related safety or regulatory concerns. This chart includes the number of on-site allegations filed with the NRC. However, each allegation may contain multiple complaints. The multiple complaint count is not included on this chart. Also, an allegation about a safety-conscious work environment (SCWE) problem at a facility is important. However, a Notice of Violation cannot be issued, because there is no applicable NRC regulation. Note: There are 64 nuclear power plants; the majority have more than one reactor for a total of 104 reactors in the U.S.
