# Seminar "ASIA×JAPAN×ResorTech OKINAWA" in Singapore

## ※Outline

Okinawa Prefecture presents " ASIA×JAPAN×ResorTech OKINAWA " seminar for companies in Singapore that are interested in doing business in Japan and using Okinawa as a base to advance into the Japanese market.

Okinawa is most famous as a resort destination in Japan, but also has drawn a great deal of attention for its great business environment such as Japanese only special economic zone which offer tax preferential treatment for targeted business and substantial support for strategic industries. Okinawa has strongly promoted its IT industry over a decade and established a Cloud infrastructure. Okinawa and Singapore are seamlessly connected to a submarine cable with high-speed, large volume and low cost which is the most direct route to Tokyo. And we have cloud data centers that are seamlessly connected with respective major bases in Okinawa by high speed optical lines, and we offer a risk dispersion function such as backups to these centers for domestic and overseas data.

We also introduce International IT Trade Fair "ResorTech Okinawa" which is scheduled to be held in February. Tourism and IT industries are said to be the world's greatest growth industries. By combining these two industries, we will lead the innovative businesses from Okinawa to the world. Please come and join our seminar. We offer you a wonderful opportunity to realize the merits of Okinawa as your business partner.
